

Committed to Caring People

COMPANY PROFILE:

Managing Director

Trugen Pharmaceuticals Pvt. Limited was incorporated on 8th July 2005 by Mr. Vivek Garg. The Director has more than 40 years experience in Pharmaceutical Industry.

In June 2006 **Trugen Pharmaceuticals Pvt. Limited** established an ultra-modern facility to manufacture Tablet, Capsule, Oral Liquid and Sachet products at Village Tejjupur, near Chodiala Rly. Station, Roorkee, Distt. Haridwar, Uttarakhand - 247661 (INDIA) on a total plot area 58760 square feet.

The factory is situated in an open green space and there is no unit producing of obnoxious in that area. It is situated about 25 kilometers from Roorkee Railway station, airport is located about 65 kilometer at Jolly Grant Dehradun.

The unit employ experienced technical staff for managing Warehouse, Production, Engineering, Quality Control & Quality Assurance functions and supported with a team of skilled experts.

All the Raw material, Intermediate Products, Finished Products and Packing Material are tested as per specified standards for Chemical, Physical, Instrumental and Microbiological properties in a well-equipped laboratory

The company has a Quality Assurance Department which constantly supervise, control and monitor its formulation product at every stage.

It has a full-fledged utilities section.

Today, with an impeccable reputation of uncompromising quality and timely delivery, Trugen has emerged as the partner of choice for contract manufacturing.

- A Renowned contract manufacturer of various leading Pharmaceutical companies for the Domestic & Export Markets.
- A Quality conscious exporter of Pharmaceutical products. The company's products are currently being exported to multiple countries and are under registrations in several other countries.

THE COMPANY IS MARKETING ITS PRODUCT IN INDIA HAS CARVED A NICHE FOR ITSELF BY VIRTUE OF THE QUALITY OF ITS PRODUCTS

FORMULATIONS:

The plant is engaged in the manufacturing of Solid, Semisolid & Liquid Dosage form (Non-Beta Lactam) such as :

TABLETS

ORAL LIQUID

CAPSULES

SACHET

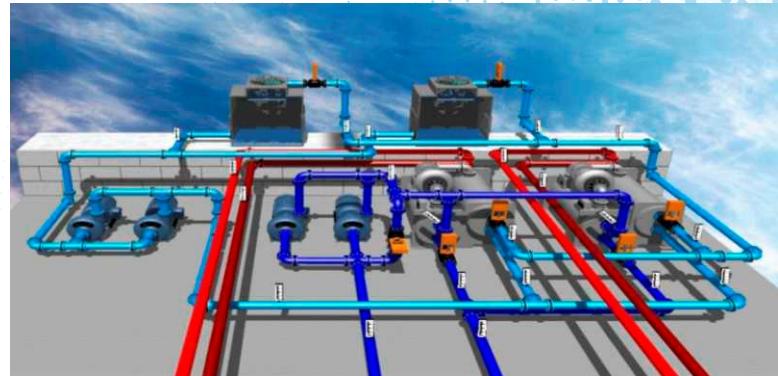

Details of categories of formulations manufactured are as below:

1. Analgesic, antipyretics/ anti-inflammatory
2. Antibacterial
3. Vitamins
4. Antihistaminic and sedatives
5. Uterine stimulants

11. Anthelmintic
12. Lipid lowering & blood pressure lowering drugs
13. Diabetic
14. Nephro etc.

UTILITY:

Ventilation System :

For environmental control in the company appropriate ventilation arrangements have been provided in the factory. There is total number of 32 AHUs + 08 Exhausts have been provided in the facility. Each section has its own air handling system and has temperature & humidity controls. The corridors are also environmentally controlled and are at positive pressure as compared to the individual rooms to prevent any mixing of air / powder from each room to the corridors. Pressure balancing of each room to the corridors is properly maintained. Pressure balancing of each air handling system has been done to avoid any cross contamination.

All environment parameters like Particle monitoring, HEPA filter integrity testing, Air change rates, Air pressure differentials, Temperature, Humidity and Microbiological Monitoring are checked at periodic intervals.

Water System :

There is bore well as a source of raw water.

Water system is installed to produce purified water for use in oral liquid batch, paste making and final washing of utensils/ equipment.

The raw water storage tanks are regularly cleaned & the record of cleaning is maintained. Waste water of utensils goes to the ETP plant.

ETP Plant :

The ETP plant is installed for treating the waste water. The waste water after treatment from ETP plant is used for plantation.

Major Utilities :

DG Set - 300 KVA and 100 KVA are dedicated for power backup. Oil free Air Compressors are installed.

Online UPSs are installed for office and Quality Control Lab for proper running of equipments.

EMPLOYEES

Sachets	6 lakh sachets

QUALITY CONTROL:

The In-Process Quality Control & Assurance plays an important role in the manufacturing process as it continuously monitors all production processes at every stage for the accuracy to be brought out in the products. Frequent quality parameter checks are conducted to ensure a perfect product. Quality Control Lab forms the heart of our manufacturing facilities and plays a vital role in regulating the quality of products.

Trugen Pharmaceuticals Pvt. Ltd. has a fully equipped-

1. Instrument Lab having instrument such as-
 1. 3 HPLC Spectrophotometer.
 2. 2 UV Spectrophotometer.
 3. Tablets parameters testing machines etc.
2. Chemical Lab.
3. Micro Lab - having separate AHU's for LAF entry and exit and other sections.
4. Separate quality control office.

Trugen Pharmaceuticals Pvt. Ltd. has an in-house fully equipped laboratory to carry out analysis of API's, Excipients & Packing Material by physical, microbiological, instrumental & chemical testing and effective process control.

Instrument calibration and validation is a routine feature at **Trugen Pharmaceuticals Pvt. Ltd.** to ensure accurate analysis results.

Trugen Pharmaceuticals Pvt. Ltd. has walking stability chambers machine and accelerated stability chambers to carry out stability studies for different climatic zones as per the ICH & WHO guidelines.

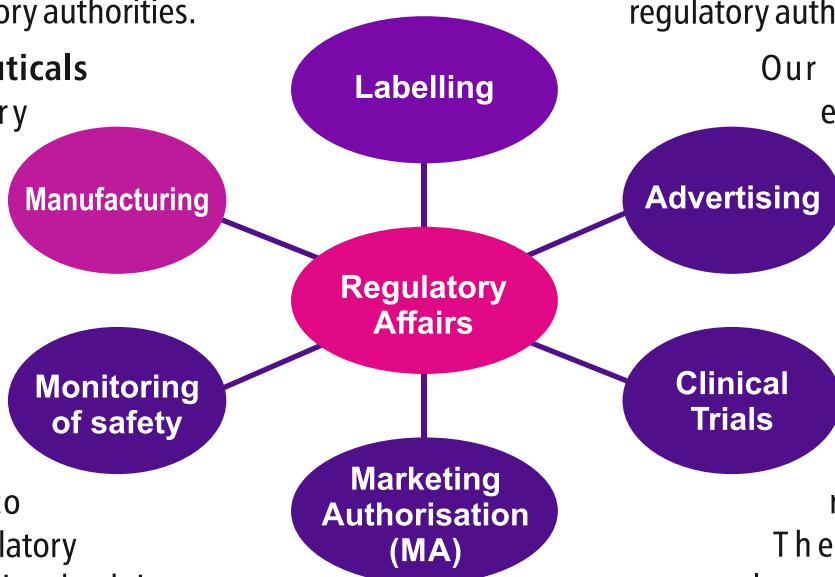

REGULATORY AFFAIRS:

The Regulatory Affairs department is an important part of the organizational structure of pharmaceutical companies. Internally it liaises at the inter phase of drug development, manufacturing, marketing and clinical research. Externally it is the key interface between the company and the regulatory authorities.

In Trugen Pharmaceuticals Pvt. Ltd., Regulatory Department is involved in the development of new medicinal products from early by integrating regulatory principles and by preparing and submitting the relevant regulatory dossiers to health authorities. Regulatory Department is actively involved in every stage of development of a new developed medicine and in the post-marketing activities with authorized medicinal products.

Trugen Pharmaceuticals Pvt. Ltd., Regulatory Affairs professionals play a key role in guiding drug development strategy in an increasingly global environment. But they also play an important operational role by considering the best processes to follow and enabling structured interaction with regulatory authorities.

Our regulatory team ensures that the information and data to be conveyed and discussed with the regulatory bodies are presented in the right way and form.

They develop the regulatory strategy, arrange agency meetings, prepare and compile the questions and briefing documents.

R & D

We have strong foundation of **research & development** approved by department of scientific and industrial research (which DSIR) help us develop products that are potent as well as optimized to deliver maximum results every time.

R&D activities are focused on process development. The sophisticated labs, manned by a talented, well-qualified team of professionals. The department plays an active role in the section of new products and charting non-infringing routes for manufacturing the same.

Our R&D department enables us to perform to perfection, time after time!

SOME LIST OF COPP AVAILABLE PRODUCTS

TABLETS
